### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC '§ 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 14 and 17-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Krishnan (USPN 5998299).

Referring to Figs. 10-11C, and 15A-15D and related text, Krishnan discloses [Re claim 14] a method of forming a semiconductor device, the method comprising the steps of: forming a layer of insulation material 201 over a semiconductor substrate 200; forming a layer of conductive material 210 on the layer of insulation material; etching the layer of conductive material to form a trace, the trace having a top surface; and etching the trace to form a number of slot openings in the top surface of the trace; [Re claim 17] wherein the trace is connected to a contact 202; and [Re claim 18] wherein the trace is connected to a via 202.

### ***Claim Rejections - 35 USC '§ 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the

Art Unit: 2812

subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 1038 and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 15-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Krishnan.

Krishnan also discloses wherein the trace is formed to have a number of loops; and wherein the loops lie substantially in a same plane (see Figs. 10-11C).

But it fails to disclose expressly all the features being in the same embodiment .

However, it would have been obvious for a person of ordinary skills in the art to use the disclosed features in the same embodiment to obtain the desired features suitable for a specific application.

Therefore, it would have been obvious to use Krishnan' teaching to obtain the invention as specified in claims 15-16.

***Conclusion***

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ha T. Nguyen whose telephone number is (571) 272-1678. The examiner can normally be reached on Monday-Friday from 8:30AM to 6:00PM, except the first Friday of each bi-week. The telephone number for Wednesday is (703) 560-0528.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael S. Lebentritt, can be reached on (571) 272-1873. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
